ZADANIE 1. Przeczytaj tekst „Transport in London” i wykonaj poniższe zadania.

One of the most popular ways of getting around London is on the underground, also known as The Tube. London has a good underground system with colour coded routes and clearly signposted stations. Some lines run into the suburbs. The trains are all one class and smoking is not allowed on board trains or at stations. The Tube is the fastest and the cheapest way of getting around the city.

The red London buses are famous all over the world. Many of them are double-deckers, because they have two decks. London buses stop at around 17,000 stops.

If you are visiting London, it is a good idea to buy a London Travelcard which allows unlimited travel on both the Underground and buses. You can buy Travelcards for 7 days or more but you need a passport-sized photo. The London transport system is divided into zones, so you must be sure you have the right travelcard if you plan to travel outside the city centre.

You can also travel by taxi but it is more expensive. London taxis are known as black cabs because of their colour. You can stop them in the street or find them in taxi ranks near hotels, stations or other places.
